

Instructors-Integrating the Turnitin LTI with Canvas

This document will walk you through the steps on how to Integrate the Turnitin LTI (Learning Tools Interoperability) with Canvas and how to create Turnitin assignments within Canvas. The Turnitin LTI tool supports Originality check, GradeMark, and PeerMark and can pass the grades for the Turnitin assignment to the Canvas gradebook

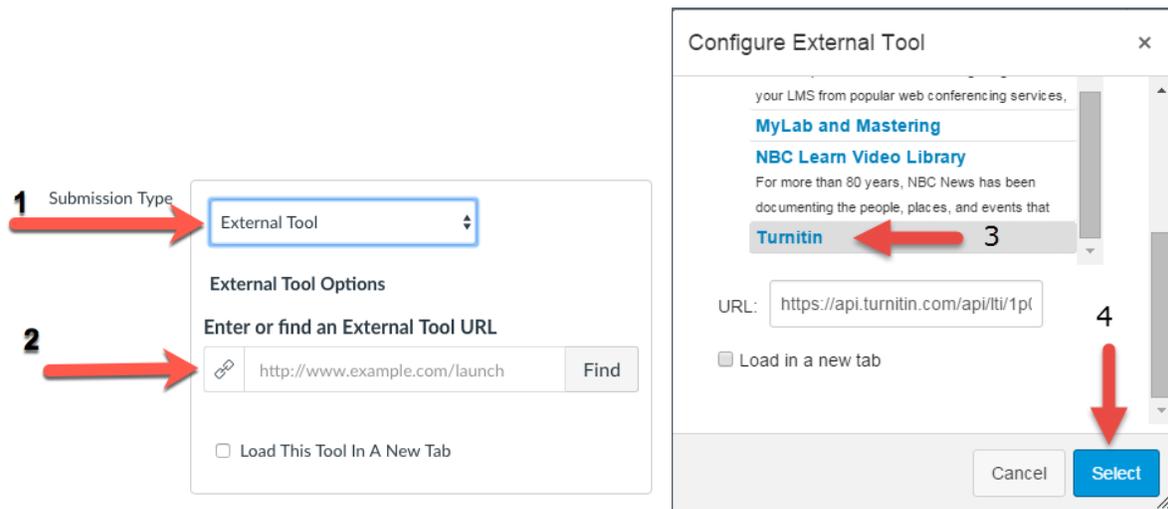

Creating a Turitin LTI Assignment:

Go to one of your Courses where you want to integrate the Turnitin LTI in Canvas. Create a new Assignment and scroll down to more options to create a new Turnitin assignment, as shown below.

The image shows two screenshots of the Canvas LMS interface. The top screenshot displays the 'Assignments' page with a search bar and a '+ Assignment' button highlighted by a red arrow. Below the search bar, there is a list of assignments, including one titled 'Overview of Canvas' which is closed and due on Jul 17, 2017. The bottom screenshot shows the 'Turn it in assignment' editor, featuring a rich text editor with various formatting options (bold, italic, underline, text color, background color, link, unlink, image, video, embed) and a 'HTML Editor' link. The editor is currently empty, and the word count at the bottom right shows '0 words'.

Integrating Turnitin LTI with your Course:

1. Select “External Tool” under Submission Type.
2. Then click on “External Tool URL”.
3. On the Configure External Tool window, click on “Turnitin”.
4. Once you select “Turnitin” the external link will automatically pop-up in the URL box. Click on “Select”, as shown below.
5. Next, enter the available from, until, and due dates.

Once you have chosen all the options, click on “Save”.

Optional Settings

Submit

Turnitin Assignment Options:

Submit Papers Option

Instructors can set the submit papers option to either a standard paper repository or select not to store the submitted papers.

Submissions to this assignment will be stored in:

Standard paper repository ▼

Standard paper repository

Do not store the submitted papers

Late Submissions and File Types

Check the “Allow late submissions” option to allow students to submit (if not already submitted) after the Due date. Check the “Allow submission of any file type” option if you will allow any file type to get submitted.

Optional Settings

Submission settings

Do not store the submitted papers 

Allow submission of any file type 

Allow late submissions 

Enable anonymous marking 

Comparing Submissions

The “Compare submitted papers against the following sources” option will allow the instructor to compare submissions by the students against available repository sources.

Optional settings

Allow late submissions?

Yes No

Compare submitted papers against the following sources:

- Student paper repository
- Institution student paper repository
- Current and archived web site content
- Periodicals, journals and publications

Originality Report Generation and Resubmissions

An Originality Report provides a summary of similar or matching areas of text in a submitted paper by a student. As shown below, the options allow an instructor to generate reports immediately or on a due date with an option to allow resubmissions.

Originality Report generation and resubmissions

- Generate reports immediately (resubmissions are not allowed)
- Generate reports immediately (resubmissions are not allowed)**
- Generate reports immediately (resubmissions are allowed until due date)
- Generate reports on due date (resubmissions are allowed until due date)

Bibliographic Materials

These options allow the instructors to control the bibliographic materials, quoted materials and small matches to be automatically excluded from the originality reports. For “Exclude small matches” if selected, you will be asked for exclusion type. You can enter the word count or the percentage to be excluded from the originality report.

Allow students to view Similarity Reports ?

PeerMark Assignments and Rubric

PeerMark allows students to read, review, score or evaluate one or more papers submitted by other students in the class. These options will allow an instructor to add PeerMark assignments to enable students to evaluate other peers in their class.

You can also attach a previously created or imported rubric to your Turnitin assignment or create a new rubric by clicking on the “Launch Rubric Manager”, as shown below. Note: An imported rubric must have been previously created using Turnitin.

Enable grammar checking using ETS® e-rate® technology ?

Attach a rubric ?

Enable Grammar Check

The ETS eRater feature provides detailed grammar feedback on the submission. Students can check the grammar feedback in the GradeMark for their submitted assignments. GradeMark is used to grade student's submitted work by adding comments within the body of the paper.

The instructor can choose the ETS Handbook level from the drop down menu, a dictionary for spell check, and can also select which categories of the English Dictionary should be enabled.
