

# CLOSING THE INNOVATION GAP

REIGNITING THE SPARK OF CREATIVITY IN A GLOBAL ECONOMY

## Judy Estrin

### *Sustainable Innovation*

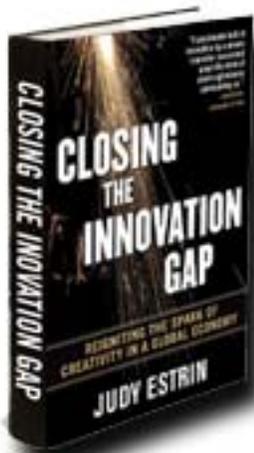

Wednesday, Feb. 9th  
6:00p.m.

Morris Dailey Auditorium  
San José State University

FREE & open to the public  
Seating is limited - Please RSVP

### Book sale and signing after the presentation

Judy Estrin was one of the first to sound the alarm about the Silicon Valley's declining innovation ecosphere. Her presentation is relevant for anyone who cares about the long-term health of the Valley and creating innovative organizations. Estrin's big picture view includes action steps for scientists, policy makers, educators, engineers, and business people.

Estrin, CEO of JLABS, LLC and former CTO for Cisco Systems, has been named three times to Fortune Magazine's list of the 50 most powerful women in American business. She has co-founded four successful technology companies. She sits on the boards of directors of The Walt Disney Company as well as the privately held Packet Design, Inc. She has also served as a member of the board of FedEx Corporation, Sun Microsystems, and Rockwell Corporation. In addition, she sits on the advisory councils of Stanford's School of Engineering and Stanford's Bio-X initiative. She holds a B.S. degree in math and computer science from UCLA, and an M.S. in electrical engineering from Stanford University.
